

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Introduction

This Management Discussion and Analysis (“MD&A”) reflects the assessment by management of the results and financial condition of Bullion Gold Discoveries Corp. (“Bullion” or the “Company”) and should be read in conjunction with the Company’s unaudited consolidated interim financial statements for the six-month periods ended June 30, 2026 and 2025 and the notes thereto (the “Financial Statements”). The Board of Directors (the “Board”) is responsible for ensuring the management fulfills its responsibilities for financial reporting.

This MD&A has been prepared as of August 17, 2026, the date the Board approved this MD&A and the Financial Statements. All amounts are expressed in Canadian dollars unless otherwise stated.

Description of Business

Bullion is a mineral exploration company listed on the **TSX Venture Exchange under the symbol BGD.V**. The Company is engaged in the acquisition, exploration, and development of mineral properties in Québec. The Company has not yet determined whether its properties contain economically recoverable reserves. The Company remains **exploration-stage**, with no operating revenues. Additional information is available on **SEDAR+**.

Forward-Looking Statements

This MD&A contains forward-looking information within the meaning of applicable securities legislation. Forward-looking statements relate to future events or performance and include statements regarding the Company’s exploration plans, financing requirements, and development strategy. Such statements are based on assumptions and subject to risks and uncertainties that could cause actual results to differ materially.

Overview and Corporate Strategy

The Terragold project (38 claims – 2,058 ha) is located approximately 12 km south of the municipality of Senneterre in Abitibi (Québec, Canada) within the prolific Abitibi Greenstone Belt. The main gold showing, discovered in the early 1960s, has been intersected by drilling over a cumulative strike length exceeding 2 kilometres to a depth of approximately 250 metres and has seen very limited exploration activity since 1984. The gold mineralized corridor, associated with a quartz–feldspar porphyry system, remains open in all directions. The potential of the system is supported by a historical 245 kg bulk sample grading 4.84 g/t Au, demonstrating mineralization outcropping at surface.

In addition, Bullion is also working with its optionee Olympio Metals in the advancement of the Bousquet Gold Project, located along the prolific Cadillac-Larder Lake Fault Zone, approximately 30 km west of Rouyn-Noranda, Québec.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Q2 2026 Overall Performance Highlights

CORPORATE

Name Change

- On June 11, 2026, Bullion completed a name change from “Bullion Gold Resources Corp.” to **“Bullion Gold Discoveries Corp.”** (the “Name Change”), reflecting the Company's focus on discovery-driven mineral exploration and the advancement of its portfolio of underexplored projects in Québec.
- The common shares of the Company are trading on the TSX Venture Exchange under the same stock symbol “BGD”. The Company’s new CUSIP number is 119933109 and the new ISIN number is CA1199331093. The share capital of the Company remains unchanged.
- There was no consolidation of capital associated with the Name Change. The Name Change did not affect the rights of the Company’s shareholders.

2M\$ Private Placement

- June 17, 2026, Bullion announced the **closing of a non-brokered private placement (the “Offering”), raising gross proceeds of \$2,000,000 through the issuance of 22,222,222 units of the Company (the “Units”) at a price of \$0.09 per Unit.**
- Each Unit consists of one common share of the Company and one-half of one common share purchase warrant (each whole warrant, a “Warrant”). Each Warrant entitles the holder to acquire one additional common share of the Company at a price of \$0.15 per share for a period of 18 months from the closing date.
- The Offering was oversubscribed and increased from the originally announced maximum size of \$1.5 million due to strong investor demand.

Annual General Meeting of Shareholders

- June 22, 2026, Bullion announced the voting results from its Annual General Meeting of Shareholders (the “AGM”) held on June 22, 2026.
- Shareholders approved all matters presented for consideration.
- The following nominees were elected as directors of the Company:
 - Jean-David Moore, Luc Gervais, Gilles Laverdière, Mylène Vallières, Éliane Grant, Jérémie Fournier et Simon Britt

Stock Option Grant

- June 22, 2026, Bullion announced that it has granted an aggregate of 3,850,000 incentive stock options to certain directors, officers and consultants of the Company pursuant to its Stock Option Plan.
- The options are exercisable at a price of \$0.10 per common share for a period of five years from the date of grant. The options will vest in four equal installments of 25% every six months from the date of grant.

New Corporate Website

- Bullion is also pleased to announce the launch of its new corporate website at bulliongold.ca.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Q2 2026 Overall Performance Highlights *(continued)*

EXPLORATION

Terragold project:

- Historical compilation completed and production of a 3D geological model on May 13, 2026
- **Validation drilling campaign started on June 30th, 2026**
 - Filed crew mobilized on June 9, 2026
 - Forestry intervention permit for access to drill sites obtained
- Transfer of the mining claims to Bullion in progress

Bousquet Gold project:

- On May 27, 2026, Bullion announced that optionee Olympio Metals Limited (“OLY”) resumed drilling activities (Phase 3 drilling campaign)
- The Phase 3 drilling campaign will test the lateral extension of the bonanza intercept of **19.4 m grading 17.29 g/t Au from 172.5 m in the Main Lode system** and subsequently test the down plunge extension;
- OLY reached the milestone required to earn 51% ownership of the Bousquet Gold Project.

Langlade project *(formerly Cadillac Extension)*:

- On April 9, 2026, Bullino announced the completion of its drilling campaign totaling 1,771 m over 11 diamond drill holes (“DDH”).
- Initial DDH results of LAN-26-27 and LAN-26-28 confirm lateral extension of the Langlade showing
- **Significant intercept of 9.5 m grading 1.01% Cu + 2.42% Zn + 29.5 g/t Ag from 88.5m (DDH LAN-26-28)**

Exploration and Evaluation Assets

TERRAGOLD project (Gold – Abitibi Greenstone Belt)

On February 2, 2026, Bullion completed the acquisition of the Terragold project (38 claims – 2,058 ha), located within the prolific Abitibi Greenstone Belt, 12 km south of the municipality of Senneterre in Abitibi (Québec, Canada).

The main gold showing, known since the early 1960s, has been **intersected by drilling over a cumulative strike length exceeding 2 kilometres to a depth of approximately 250 meters** and has seen very limited exploration activity since 1984. The gold mineralized corridor, associated with a quartz–feldspar porphyry system, remains **open in all directions**. **Access and Infrastructure:** In addition to its proximity to Senneterre, the project benefits from direct road access, facilitating logistics for upcoming drilling campaigns. **Surface Proof of Concept:** The validity of the system is supported by a historical 245 kg bulk sample grading 4.84 g/t Au, demonstrating mineralization outcropping at surface.

For the six-month period ended June 30, 2026

On May 13, 2026, Bullion announced the completion of a comprehensive compilation and reinterpretation of historical drilling, geological and structural data culminating in the development of a 3D Leapfrog geological model for its 100%-owned Terragold Project.

- 116 diamond drill holes (“DDH”) total - 107 DDH compiled – 100 DDH with assays;
 - 98 DDH returned at least one interval grading a minimum of 0.30 g/t Au over 0.6 m
 - **21 DDH return at least one interval grading greater than 10.0 g/t Au over 0.6m**
- Gold mineralization interpreted over approximately **2.2 km of strike length** and to a **depth of 250 m, remaining open in all directions;**
- Higher-density drilling concentrated over a core zone approximately 300 m in strike length and extending to a depth of 250 m;
- **245 kg surface bulk sample grading 4.84 g/t Au;**
- DDH J-17 returned 1.5 m grading 6.86 g/t Au from 70.1 m; **subsequent half-core verification sampling returned 9.26 g/t Au.**

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

TERRAGOLD project (Gold – Abitibi Greenstone Belt) (continued)

On June 30, 2026, Bullion announced the beginning of its validation drilling program. The validation drilling program is designed to systematically test the Terragold mineralized system over approximately 300 metres along the principal mineralization trend. The program comprises approximately 3,000 metres of diamond drilling. During this initial phase, the DDHs (see Figure 1 – DDH planned) have been planned to extend the tight-spaced drill pattern directly into the Terragold Showing area. This systematic follow-up program is intended to validate historical high-grade gold intersections, confirm the continuity of mineralization, and evaluate the full geochemical signature of the mineralized system.

Figure 1. DDH planned

As at July 30, 2026, 2,052 m of drilling were completed over 16 DDH. The first 7 DDH are logged and sent for multi-element assaying. Assays results for the first 7 DDH are expected in the coming weeks.

BOUSQUET project (Gold – Abitibi Greenstone Belt)

The Bousquet gold project is composed of 71 claims covering 2,393 hectares and is located along the historical Cadillac-Larder Lake Fault Zone, a corridor within the Abitibi Greenstone Belt known for hosting numerous gold deposits, approximately 30 km west of Rouyn-Noranda, Québec and benefits from existing infrastructure and major Abitibi gold operations including LaRonde and Westwood.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

BOUSQUET project (Gold – Abitibi Greenstone Belt) (continued)

On March 19, 2025, the Company entered into an option agreement allowing Olympio Metals (“OLY”) to earn up to 80% interest by funding exploration and making cash and share payments.

Option Agreement Details:

To obtain up to an 80% interest in the Bousquet project, OLY will:

- Invest \$2 million in exploration work.
- Pay a total of \$850,000 in cash and \$400,000 in OLY shares.
- Manage the exploration work.
- **Ultimately, Bullion will retain a 20% net carried undivided interest.**

On May 27, 2026, the Company announced OLY had completed the requirements to earn an initial 51% in the Bousquet gold project.

Conditions for an additional 29% interest (Stage 2)

OLY will pay Bullion:

Timeline	Cash	OLY shares Erreur ! Signet non défini. (15-day VWAP)	Exploration works
On or before Year 4	\$50,000	\$25,000	\$200,000
On or before Year 5	\$50,000	\$25,000	\$200,000
On or before Year 6	\$50,000	\$25,000	\$200,000
On or before Year 7	\$150,000	\$75,000	\$200,000
On or before Year 8	\$200,000	\$100,000	\$200,000

Formation of a Joint Venture (“JV₂”)

If Stage 2 conditions are met by OLY, a JV₂ will be formed and:

- OLY’s interest in the JV₂ will be 80%
- OLY will sole fund Bullion’s JV₂ 20% expenditures until initial production on Bousquet
- **Bullion’s 20% interest is free carried until initial production on the Bousquet project**
- OLY will retain a right of first refusal to purchase Bullion’s JV₂ 20% interest

Performance Bonuses with a JORC gold resource if Stage 2 occurs

OLY will pay Bullion:

- \$1.50/ounce up to 250,000 ounces
- \$1.00/ounce from 250,001 to 500,000 ounces
- \$0.50/ounce beyond 500,000 ounces (no maximum)

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

BOUSQUET project (Gold – Abitibi) (continued)

OLY performed 2 drilling campaigns since optioning on March 19, 2025. A total of 40 diamond drill holes (“DDH”) for 8,722 m as of April 20, 2026.

2025 drilling results highlights include:

DDH	From (m)	Length (m)	Au g/t
BO-25-27	184.0	5.4	7.61
BO-25-28	138.0	7.9	6.20
BO-25-38	5.65	4.5	3.29
BO-25-40	355.5	14.5	1.96
BO-25-60	59.7	3.8	5.03
BO-26-63	172.5	19.4	17.29

Figure 1 - Plan view map of the Paquin and Amadee prospects

On May 27, 2026, Bullion announced that OLY is resuming drilling activities (Phase 3 drilling campaign) at the Bousquet Gold Project following completion of the requirements to earn an initial 51% interest in the project pursuant to the option agreement between the parties. The Phase 3 drilling campaign will test the lateral extension of the bonanza intercept of 19.4 m grading 17.29 g/t Au from 172.5 m in the Main Lode system and subsequently test the down plunge extension.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

LANGLADE project (formerly Cadillac Extension) (VMS – Grenville)

The Langlade project (formerly Cadillac Extension) comprises 74 mining claims covering an area of approximately 4,127 hectares, including over \$1.4 million in exploration work credits. Located approximately 100 km east of the municipality of Senneterre, this project is accessible year-round via a well-developed forest road network.

The Langlade showing is characterized by copper, zinc, silver, and gold mineralization located at the contact between felsic to intermediate metavolcanics and mafic metavolcanics (GM 65347). This project, with potential for volcanogenic massive sulfide (“VMS”) mineralization has shown very promising historical drilling results. Historical drilling has traced the mineralization eastward from the outcrops over a distance of more than 1,200 meters and down to a depth of 900 meters (GM 58489, GM 65347). The main horizon has an average thickness of 50 meters and dips gently (20°) to the southeast.

On April 9, 2026, Bullion concluded the drilling campaign totalling 1,771 m across 11 DDH. The program targeted the north-northeast limb of the same structure, a prospective area that could allow for the evaluation of a potential extension of mineralization.

On May 5, 2026, Bullion announced the assay results from the first two diamond drill holes: LAN-26-27 and LAN-26-28. Highlights include:

- DDH LAN-26-27: **4.3 metres grading 3.05% CuEq¹ (from 48.2 m to 52.5 m)**, within a broader interval of 30.2 metres grading 0.95% CuEq;
- DDH LAN-26-28: **9.5 metres grading 2.31% CuEq (from 88.5 m to 98.0 m)**, within a broader interval of 41.0 metres grading 1.03% CuEq;
- Polymetallic mineralization: Strong presence of silver (locally **up to 81.33 g/t Ag**) and zinc (locally **up to 2.42% Zn**), enhancing the economic potential of the area.

Table 1: Diamond Drill Holes (“DDH”) results

DDH	From	To	Core length ²	Cu (%)	Zn (%)	Au (g/t)	Ag (g/t)	CuEq ¹ (%)
LAN-26-27	39.80	70.00	30.20	0.30	0.28	0.19	19.12	0.95
including	48.20	52.50	4.30	0.65	0.37	0.70	81.33	3.05
including	60.00	65.20	5.20	0.55	0.09	0.20	16.06	1.10
LAN-26-28	86.50	127.50	41.00	0.47	0.64	0.10	15.17	1.03
including	88.50	98.00	9.50	1.01	2.42	0.11	29.55	2.31
including	120.50	127.00	6.50	0.67	0.15	0.26	21.27	1.41

¹ The CuEq calculation is based on metal prices of US\$4,684/oz Au, US\$75.55/oz Ag, US\$5.963/lb Cu, and US\$1.556/lb Zn. CuEq = (Cu ppm + (Ag g/t × 184.771) + (Au g/t × 11,455.5) + (Zn ppm × 0.26094)) / 10,000. CuEq is used to calculate cut-off grades for exploration purposes, and no adjustments have been made for metal recoveries.

² The reported widths correspond to core lengths. True thickness is estimated at approximately 80–85% of core length, depending on the angles of deviation.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

BODO project (Polymetallic – Eeyou Itschee - James Bay)

The Bodo project comprises 461 mining claims covering an area of approximately 24,437 hectares and is located approximately 200 km north of the municipality of Chibougamau and about 100 km south of the Eastmain mine in Eeyou Itschee-James Bay.

The Bodo property covers part of the Tichégami Group, composed of rhyolite, ultramafic intrusions, and banded iron formations (BIF). East-west to strongly northeast-trending structural zones were previously identified in a regional magnetic survey, defining large exploration targets, including the strong Rivon Lake magnetic anomaly, characterized by a semi-circular magnetic contrast 1.6 km wide.

On August 28, 2025, the Company announced the first assay results from surface sampling conducted primarily in the eastern portion of the property. These results confirm strong copper, silver, and gold values, as well as anomalous zinc, nickel, and cobalt. Highlights include:

- High-grade Cu, Ag, and Au reported from the Rivon Lake area, confirming a strong polymetallic mineralized system.
- Discovery of a new gold-bearing target (Holton Creek) grading 1.13 g/t Au located approximately 2 km southwest of Rivon Lake, along the contact of a magnetic anomaly.
- The Rivon Lake trend extends over a 3 km N-S corridor and 1,000 m E-W.
- Preliminary interpretation suggests a new geological setting and metallogenic model

Table 1 – Rivon Lake Zone (significant results)

Sample	Au (g/t)	Ag (g/t)	Cu (%)
F671605	6.85	63.00	2.82
F671606	4.14	1.30	0.01
F671609	0.56	19.10	0.80
F671613	0.65	11.00	1.38
F671616	0.28	16.10	2.21
F671617	2.53	137.00	15.20
F671703	4.17	5.90	0.02
F671707	0.58	69.40	3.96
F671713	1.16	66.00	3.22
F671714	2.20	62.40	6.83

On October 2, 2025, the Company announced the confirmation of the polymetallic character of the Canico showing, located approximately 10 km west of the Rivon showing. Various surface samples collected from rare outcrops in this area returned values of up to 2.16 g/t Au, 16.60 g/t Ag, 1.21% Cu, 1.03% Zn, and 0.4% Pb.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

BODO project (Polymetallic – Eeyou Itschee - James Bay) (continued)

The Canico showing will be the subject of more detailed investigation during the next exploration campaign. The pronounced angularity of the mineralized erratic blocks observed at surface strongly suggests a proximal source, significantly increasing the potential for in-situ mineralization discovery.

Selected Annual Information

	December 31, 2025	December 31, 2024	December 31, 2023
Total revenues	Nil	Nil	Nil
Loss before taxes	\$ 552,877	\$ 322,302	\$ 202,366
Comprehensive loss for the year	\$ 426,816	\$ 470,874	\$ 331,204
Basic and diluted loss per share	\$ 0.006	\$ 0.006	\$ 0.004
Total assets	\$ 3,827,927	\$ 2,212,280	\$ 1,836,559
Total long-term financial liabilities	Nil	Nil	Nil
Cash dividends per share for each class of share	Nil	Nil	Nil

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Results of Operations

For the six-month period ended June 30, 2026, the Company recorded a net loss of \$197,316 compared to a net loss of \$143,719 in 2025. Increased net loss in Q2 2026 compared to the same period last year due to increased in management and consulting fees.

For the six-month period ended June 30, 2026:

- The Company recorded a **net loss consistent with exploration-stage activities**¹
- Primary cost drivers:
 - Consulting fees
 - Management fees increased due to the hiring of a full time CEO on April 13, 2026.

Summary of Quarterly Results

The following results are for the quarterly periods up to June 30, 2026:

Quarter Ending	Total Assets \$	Net loss \$	Loss per Share \$
June 30, 2026	6,025,468	95,088	0.002
March 31, 2026	4,130,274	102,228	0.001
December 31, 2025	3,827,927	227,507	0.002
September 30, 2025	3,206,737	123,479	0.002
June 30, 2025	2,972,221	63,505	0.001
March 31, 2025	2,287,122	80,214	0.001
December 31, 2024	2,212,280	63,331	0.001
September 30, 2024	1,823,568	52,756	0.001

Liquidity and Capital Resources

As at June 30, 2026:

- The Company remains **dependent on equity financing**
- Completed in 2026:
 - \$2,000,000 in hard-dollars on June 17, 2026

Liquidity Assessment:

- Working capital sufficient for near-term programs
- Additional financing required for exploration and projects advancement

Going Concern

The Company's ability to continue as a going concern depends on its ability to raise additional financing.

¹ Exploration and evaluation expenditures are capitalized in the balance sheet under non-current assets.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Capital Structure (as at August 17, 2026)

Common shares	126,109,042
Warrants	35,932,115
Broker warrants	1,298,998
Options	10,100,000
Fully diluted	<u>173,440,155</u>

Related Party Transactions

The related parties of the Company include related companies and key management personnel. Unless otherwise stated, none of the transaction incorporated special terms and conditions and no guarantee were given or received. Outstanding balances are generally settled in cash.

Transactions with key management personnel

The Company's related parties include companies controlled by key management and directors. Unless otherwise stated, none of the transactions incorporated special term and conditions and no guarantees were given or received. Outstanding balances are usually settled in cash. Key management personnel of the Company are members of the Board of Directors and the key management. The Company paid \$17,878 (\$nil in 2025) in geological services to 166693 Canada Inc. a company controlled by Gilles Laverdiere, a director of the Company.

Risks and Uncertainties

The Company is subject to a number of risks and uncertainties due to the nature of its business. The Company's exploration and development activities expose the Company to various financial and operational risks that could have a significant impact on its level of operating cash flows in the future. Readers are advised to study and consider risk factors stressed below.

The following are identified as main risk factors that could cause actual results to differ materially from those stated in any forward-looking statements made by, or on behalf of, the Company.

Exploration Risk

The exploration for and development of minerals involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties that are explored are ultimately developed into producing mines. There can be no guarantee that the estimates of quantities and qualities of minerals disclosed will be economically recoverable. With all mining operations there is uncertainty and, therefore, risk associated with operating parameters and costs resulting from the scaling up of extraction methods tested in pilot conditions. Mineral exploration is speculative in nature and there can be no assurance that any minerals discovered will result in an increase in the Company's resource base.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Risks and Uncertainties *(continued)*

Operational Risk

The Company's operations are subject to all of the hazards and risks normally encountered in the exploration, development and production of minerals. These include unusual and unexpected geological formations, rock falls, seismic activity; flooding and other conditions involved in the extraction of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company.

Commodity Price Risk

The economics of mineral exploration is affected by many factors beyond the Company's control, including commodity prices, the cost of operations, variations in the grade of minerals explored and fluctuations in the market price of minerals. Depending on the price of minerals, it may be determined that it is impractical to continue the mineral exploration operation.

Mineral prices are prone to fluctuations and the marketability of minerals is affected by government regulation relating to price, royalties, allowable production, and the importing and exporting of minerals, the effect of which cannot be accurately predicted. There is no assurance that a profitable market will exist for the sale of any minerals found on the property.

Title Risk

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to mineral properties will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that the Company, as the case may be, does not have title to the properties could cause the Company to lose any rights to explore, develop and mine any minerals on that property, without compensation for its prior expenditures relating to such property.

Financing Risk

Financing Risks and Dilution to Shareholders

The Company will have limited financial resources, no operations and no revenues. If an exploration program on the Company's property is successful, additional funds will be required for the purposes of further exploration and development. There can be no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be available on favorable terms or at all. It is likely such additional capital will be raised through the issuance of additional equity, which will result in dilution to the Company's shareholders.

BULLION GOLD DISCOVERIES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Financing Risk *(continued)*

Substantial Capital Requirements and Liquidity

Substantial additional funds for the establishment of the Company's current and planned mining operations will be required. No assurances can be given that the Company will be able to raise the additional funding that may be required for such activities, should such funding not be fully generated from operations. Mineral prices, environmental rehabilitation or restitution, revenues, taxes, transportation costs, capital expenditures, operating expenses and geological results are all factors that will have an impact on the amount of additional capital that may be required. To meet such funding requirements, the Company may be required to undertake additional equity financing, which would be dilutive to shareholders. Debt financing, if available, may also involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated expansion and pursue only those development plans that can be funded through cash flows generated from its existing operations, if any.

Human Capital Risk

The success of the Company will be largely dependent upon the performance of the directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

Litigation

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit.

Conflicts of Interest

Certain of the directors and officers of the Company will be engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies and, as a result of these and other activities, such directors and officers of the Company may become subject to conflicts of interest. The BCBCA provides that in the event that a director has a material interest in a contract or proposed contract or agreement that is material to the issuer, the director must disclose his interest in such contract or agreement and refrain from voting on any matter in respect of such contract or agreement, subject to and in accordance with the BCBCA. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the BCBCA.

Risks and Uncertainties *(continued)*

Regulatory & Permitting Risk

The current or future operations of the Company require permits from various governmental authorities, and such operations are and will be governed by laws and regulations governing exploration, development, production, taxes, labor standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. Companies engaged in the exploration and development of mineral properties generally experience increased costs and delays in development and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all permits that the Company may require for the facilities and conduct of exploration and development operations will be obtainable on reasonable terms or that such laws and regulation would not have an adverse effect on any exploration and development project that the Company might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations. Amendments to current laws, regulation and permits governing operations and activities of mineral companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or exploration and development costs or require abandonment or delays in the development of new property.

Requirement for Permits and Licenses

The Company may need to acquire further permits or licenses necessary to carry on proposed exploration activities on the property. A substantial number of permits and licenses may be required should the Company proceed beyond exploration; such licenses and permits may be difficult to obtain and may be subject to changes in regulations and in various operational circumstances. It is uncertain whether the Company will be able to obtain all such licenses and permits.

Critical Accounting Estimates

Key areas of judgment:

- Impairment of exploration assets
- Share-based compensation valuation
- Deferred tax assets (not recognized)

MANAGEMENT DISCUSSION AND ANALYSIS

For the six-month period ended June 30, 2026

Critical Accounting Estimates *(continued)*

The preparation of the consolidated financial statements requires management to make judgments and estimates that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The consolidated financial statements include estimates that, by their nature, are uncertain.

The impacts of such estimates are pervasive throughout the consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and may affect both the period of revision and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the consolidated statement of financial position date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- a) The Company recognizes deferred tax assets relating to tax losses carried forward to the extent that it is probable that taxable profit will be available against which a deductible temporary difference can be utilized. This is deemed to be the case when there are sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity that are expected to reverse in the same year as the expected reversal of the deductible temporary difference, or in years into which a tax loss arising from the deferred tax asset can be carried back or forward. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped. The Company has not recognized any deferred tax assets as at June 30, 2026 and December 31, 2025.

Subsequent Events

No subsequent event.

Outlook 2026

The Company's 2026 priorities:

- **Validation Drilling Campaign at Terragold project**
- Hard-cash and flow-through private placements

Management remains focused on **value creation through discovery and asset advancement**, while maintaining disciplined capital allocation.
